

### **Clinical Equipment: £341,000**

The Charity purchased many pieces of clinical equipment which enabled the hospitals' teams to provide leading edge technology for their patients' treatment. The most significant of those purchases included:

- Stryker's PINPOINT system for laparoscopy (£129,000) to improve visual quality in real time during surgery which will assist surgeons with critical decisions and will improve patient outcomes.
- CUSA equipment (£61,000) to assist surgeons with speed and selectivity during surgery. #
- IT storage and server requirements for Optus Camera (£28,000).
- SLE 6000 Ventilator for Neonatal Unit (£28,000) to enable volume controlled ventilation to reduce the risk of barotrauma to the lungs and to enable the recording of data on each patient.
- System licence for the use of Amplitude Pro Enterprise system (£25,000): technology to allow clinicians & healthcare professionals to collect clinical outcomes and use them to measure a reduction in patient symptoms and an improvement in quality of life.
- Transfer trolleys for ICU and ITU (£23,000) for patients.
- 2D processor and camera head (£22,000): high-performance image processing electronics providing enhanced surgical visualisation.

### **Enhancing Patients' Environment: £482,000**

- Several patient areas were refurbished as a result of funding through the charity. This included spending £206,000 on repairing Burrell House Roof which is being converted into Winchester Hospice; £21,000 on centralised cooling to the Acute Assessment Unit building; £20,000 on the refurbishment of ward D1 and £19,000 on refurbishment of rooms within the Audiology Department; £61,000 is committed to be spent on a communal area for patients on Kingfisher Ward at Andover War Memorial Hospital.

### **Enhancing Patients' Welfare: £84,000**

- A total of £63,000 was spent on non-medical equipment to enhance the comfort of patients and carers during their stay in the hospitals, including furniture, gym equipment and fans. £20,000 is committed to be spent on a nutritional assistant on a

trial basis for 12 months to provide nutritional help and advice for the patients across both trauma wards at Basingstoke and North Hampshire Hospital.

**Supporting our staff to be even better: £234,000**

Many grateful patients offer donations for the direct benefit of the ward team who have looked after them. These donations are used in two main ways; either to provide additional education to enhance the skills of the team so they can offer even better care to their patients; or to enable team development activities which help improve staff morale and retention both of which are key aspects in delivering high quality healthcare. A total of £168,000 was used to enable staff to attend educational programmes to expand their skills and knowledge to do their jobs better. In addition, £38,000 was spent on team development and morale building items. £28,000 was committed to provide staff with secure cycle parking and an electric bike trial which also supports the Trust's Green Travel Plan objectives.
